MagiCAD

Content

Purpose of the program

System Jeven Product Service aims to help you calculate air flows and select kitchen hoods for all your professional kitchen projects.

System Jeven Product Service personnel make upon request complete proposals of the hood drawings with pressure and airflow data and send them to you by e-mail.

With the Jeven MagiCAD plugin for BricsCAD you are able to import these drawings to the MagiCAD for BricsCAD software on your computer.

The Jeven MagiCAD plugin for BricsCAD is available on the homepages www.jeven.com and www.magicad.com
Please select the closest System Jeven Product Service office to you on our homepage www.jeven.com and contact us for more information.

Program installation

1. Ensure that you have one of the following versions of MagiCAD and BricsCAD on your workstation:

   - MagiCAD 2024 and BricsCAD V24
   - MagiCAD 2025-2026 and BricsCAD V25

2. The installation package is available at MagiCAD´s website https://portal.magicad.com/download/ProductSearch?searchStr=Jeven&categoryId=3

3. Install the program by starting Jeven MagiCAD plugin for BricsCAD xxxx.x.x.msi and follow the setup instructions, leave the serial number field blank:
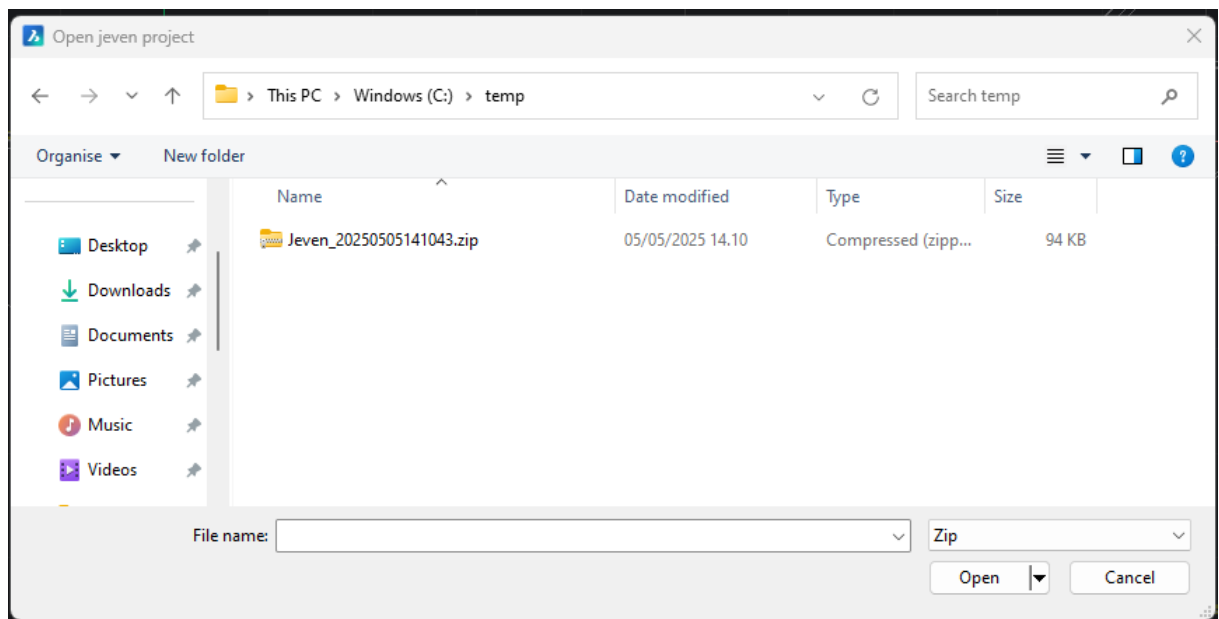

Starting the program

1. Start the BricsCAD software. After installation the plugin panel and buttons can be found from MagiCAD Connect tab.

2. Jeven toolbar and ribbon panel button appears on BricsCAD:

How to use Jeven MagiCAD plugin

1. System Jeven Product Service sends the project drawings to the customer in a ZIP file. Save the ZIP file to your computer.

2. Run "Import Jeven project" command by clicking the Jeven toolbar button or ribbon panel button.

3. Find saved ZIP file and open it.

4. Select MagiCAD supply and exhaust duct systems and add a description.
