MagiCAD New Features

MagiCAD 2021 MR for Revit – New features:

Compatible with Autodesk Revit 2018, 2019, 2020 and 2021

- Install Back Boxes For Electrical Devices
- Create Automatic Main Riser Diagrams
- Define Bend Radius For Crossings
- Support For Using Multiple Shared Parameter Files
- Renewed Update Parameter Tool And Improved Handling Of Parameters In Schematics
- Easy Access To The Help Manual
- Gas System Design With Integrated Calculations
- Upgraded Drainage Connection Tool

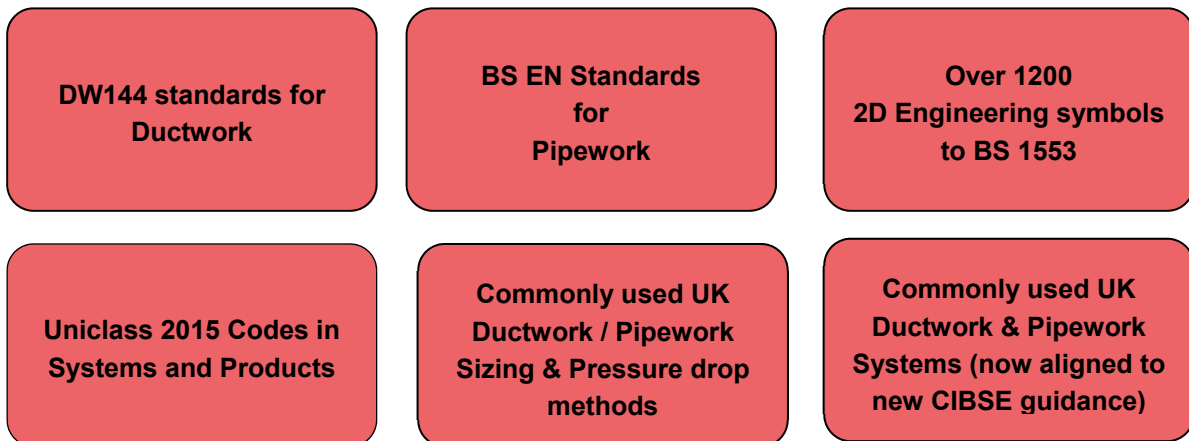

UK Localisation

Out-of-the-box Revit provides a global 3D collaborative design platform for all aspects of Mechanical, Electrical and Plumbing (MEP) design. Revit ships as a 3D coordination platform with the ability to perform basic calculations aligned to American design standards and workflow. In order to use UK content and enable UK aligned calculation outputs, MagiCAD for Revit is the solution of choice. As an Autodesk AEC Solution Associate, we work to fill in the gaps with localised content and align Revit to a country specific design workflow.

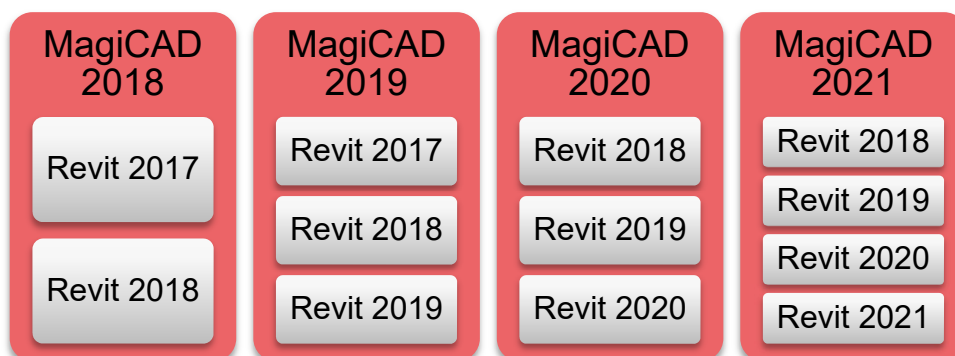

For our UK and Irish markets, MagiCAD is localised to meet the calculation, presentation and workflow requirements of the MEP industry. When installed, MagiCAD offers content such as ductwork and pipework fittings, more than 1,500,000 manufacturer-verified MEP product variants, and over 1200 BS engineering symbols. MagiCAD overrides the ASHRAE calculation engine, enabling customers in the UK and Ireland to perform fully integrated pressure drop calculations, domestic water and drainage diversity calculations, and sprinkler calculations to local standards.

MagiCAD for Revit unlocks the potential of Revit to offer powerful modelling tools, MEP content, calculation outputs, and the templates required to support the successful delivery of projects to a UK and Irish design workflow.

UK Aligned Standard & Specifications

Version Compatibility

Installing a new localisation pack

MagiCAD Website

To install the latest localisation pack, go to www.magicad.com/Downloads/Localizations and filter through the menu shown below to find the relevant UK files.

Download MagiCAD Localizations

Use the search control below to search for localisations. To download a localisation file, click on the Download button displayed on the relevant localisation file in the search results below.

TECHNOLOGY  Autodesk AutoCAD **Autodesk Revit**

LANGUAGE  Danish German **English** Finnish

French Italian Dutch Norwegian

Polish Russian Swedish Chinese

SEARCH  UK Files **GO**

To download from the website, you will need your MagiCAD Activation key. This will be provided to a member of your organisation who was selected to be your MagiCAD company representative when MagiCAD was purchased. Please see the example below: -

The screenshot shows a MagiCAD License Certificate. At the top left is the MagiCAD logo. At the top right is the Certificate ID: 00000000-0000-0000-0000-000000000000. The title is "MagiCAD License Certificate". Below the title, it states: "Progman Oy grants Progman Software UK Limited the right to activate the following product(s):". A table follows with the following columns: Activation ID, Upgraded from, Product, License exp., Maintenance expiration date, and Seat Count. The table contains one row: Activation ID (blurred), Upgraded from (blurred), Product: MagiCAD Beta Suite ver: 2019, Stand Alone License, License exp.: 31.03.2019, Maintenance expiration date: -, and Seat Count: 1. Below the table, it says: "The Activation ID(s) will be required to activate the product(s). If you have any questions, please contact your reseller for further information." At the bottom, it says: "Progman Oy | Nonsamontie 1, 26100 Rauma, Finland | mail@magicad.com | www.magicad.com".

Activation ID	Upgraded from	Product	License exp.	Maintenance expiration date	Seat Count
		MagiCAD Beta Suite ver: 2019, Stand Alone License	31.03.2019	-	1

Once you have signed in you can download and install the localisation pack.

When you install MagiCAD to your machine, like other software programs, all of the required files will be installed into the "Program Data" folder. The MagiCAD file path is C:\ProgramData\MagiCAD-RS. All of the installed versions of MagiCAD will be shown here. The Program Data folder is hidden in Windows Explorer by default, if you cannot see the Program Data folder you should contact your I.T. Manager for access.

If you already have earlier versions of MagiCAD installed, you will have numerous folders as shown below. The first set of numbers in the folder names is the MagiCAD Version and the second set of numbers with the prefix (r_) is the Revit version which the MagiCAD installation is compatible with.

-  2020_r2018
-  2020_r2019
-  2020_r2020
-  2021_r2018
-  2021_r2019
-  2021_r2020
-  2021_r2021

Within these folders you will find all of the MagiCAD specific folders as shown below.

Name	
2Dsymbols	
Annotations	
Configurations	
Controls	
Datasets	
Demoproject	
Design	
Documents	
FamilyTemplates	
Products	
Rfa3d	
Sheets	
Templates	
magiParameters.txt	

The key localisation folders for the UK are as mentioned below, these folders contain the information which MagiCAD uses to provide localised content:

Annotations

This folder contains a master set of annotation families updated with each release.

Dataset

This folder contains the most up-to-date master dataset with the updates incorporated as detailed later on in this document.

Templates

This folder contains the most up-to-date master Revit template with the updates incorporated as detailed later on in this document.

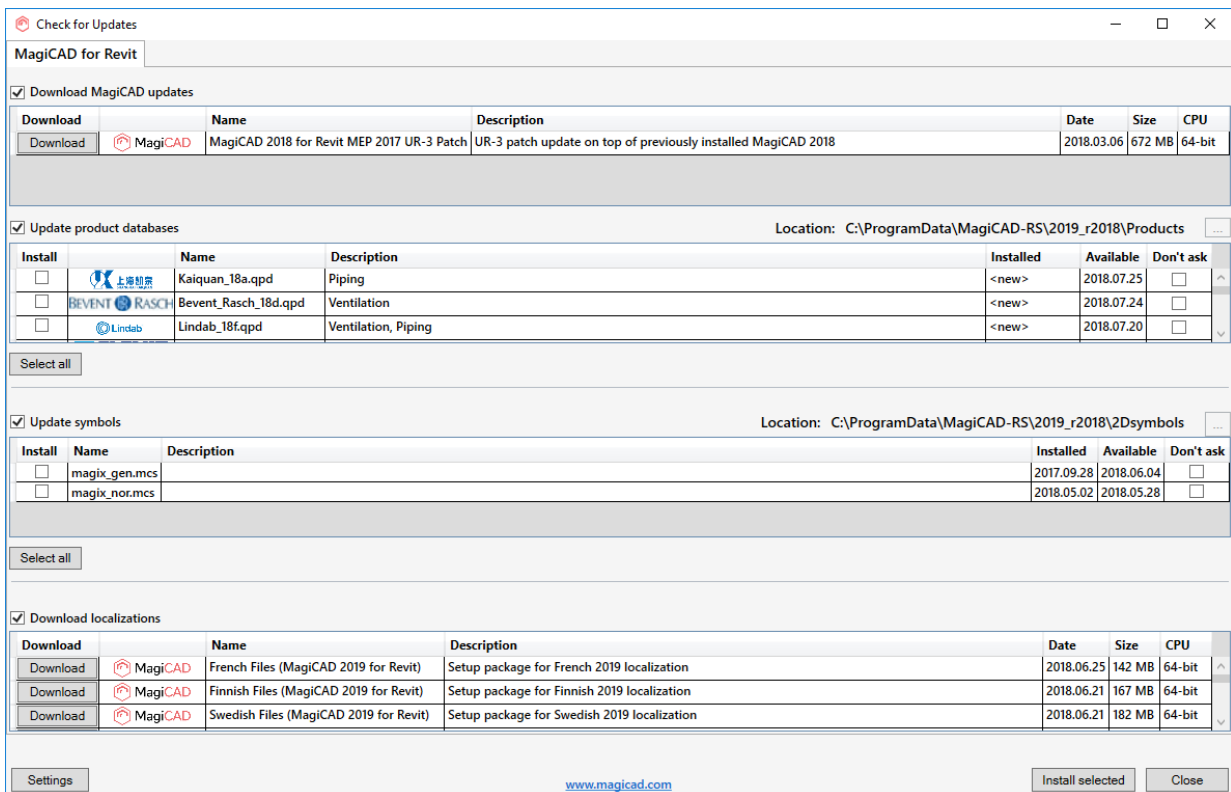

Shared Parameters

This text file brings in all of the relevant parameters within MagiCAD. We recommend that this file should be read-only and should not be edited.

Check for Updates

The MagiCAD updater is a tool for updating the latest versions of MagiCAD's product databases, symbols, localisation files and plug-ins. The tool can be found in the common tab of MagiCAD for Revit.

After clicking the check for updates button a list of available updates will be shown. Simply select the updates you wish to install and click **Install selected**.

Available Localisation Packs

MagiCAD 2021 Main Release (MR) for Revit

MagiCAD version 2021 (rev.a) MR

Updates incorporated within (rev.a) MagiCAD version 2021 MR.

Revit Template [UK-MCREV-2021_a_r2018.rte](#)
 [UK-MCREV-2021_a_r2019.rte](#)
 [UK-MCREV-2021_a_r2020.rte](#)
 [UK-MCREV-2021_a_r2021.rte](#)

General Configurations

- Builderswork filter added to relevant views.
- Electrical system filters aligned with CIBSE guidance.

Tags & Annotations

- Standard "MC_Connection_Node_Gas_Piping.rfa" Gas Connection Node tag created for new Gas Calculations function.

Dataset [UK-MCREV-2021_a_r2018.mrv](#)
 [UK-MCREV-2021_a_r2019.mrv](#)
 [UK-MCREV-2021_a_r2020.mrv](#)
 [UK-MCREV-2021_a_r2021.mrv](#)

Devices & Components

15mm DWS_WC Outlets added.

Back boxes has been added to the Dataset.

Duct, Pipe & Cable Route Series

New Trunking series added to Cable Routes; "Galvanised Steel Trunking".

New duct sizes added to all DW144 Ductwork.

Piping

New Gas types added along with more gas devices and gas valves.

MagiCAD 2020 Update Release 2 (UR-2) for Revit

MagiCAD version 2020 (rev.c) UR-2

Updates incorporated within (rev.c) MagiCAD version 2020 UR-2.

Revit Template **UK-MCREV-2020_c_r2018.rte**
 UK-MCREV-2020_c_r2019.rte
 UK-MCREV-2020_c_r2020.rte

General Configurations

- Updated System names and colours in line with new Society of Digital Engineering (CIBSE) Guidance. (Documentation can be found from the CIBSE website here: <https://www.cibse.org/knowledge/cibse-publications/cibse-digital-tools> and in the MagiCAD UK localisation pack C:\ProgramData\MagiCAD-RS\2020_r2018\Documents\UK\)
- New splash screen added including list of important template items and project implementation Datasheet.
- QA Checking Views added for piping & Ventilation

Dataset **UK-MCREV-2020_c_r2018.mrv**
 UK-MCREV-2020_c_r2019.mrv
 UK-MCREV-2020_c_r2020.mrv

Duct, Pipe & Cable Route Series

- Generic 3-Port valve has been added to the dataset for new feature.

MagiCAD 2020 Update Release 1 (UR-1) for Revit

MagiCAD version 2020 (rev.b) UR-1

Updates incorporated within (rev.b) MagiCAD version 2020 UR-1.

Revit Template **UK-MCREV-2020_b_r2018.rte**
 UK-MCREV-2020_b_r2019.rte
 UK-MCREV-2020_b_r2020.rte

General Configurations

- Updated System names and colours in line with new Society of Digital Engineering (CIBSE) Guidance. (Documentation can be found from the CIBSE website here: <https://www.cibse.org/knowledge/cibse-publications/cibse-digital-tools> and in the MagiCAD UK localisation pack C:\ProgramData\MagiCAD-RS\2020_r2018\Documents\UK\)
- Updated Electrical View Templates in line with the abovementioned guidance.
- Added Example BS1192 Parameters and added a label to all Sheet templates from A3 to A0 to demonstrate how parameters like these can be used in conjunction with the Sheet Manager tool.
- Updated view templates to allow for new functions and to improve existing functions.
 1. Automatic Sketch Dimensions in Lighting View Template to improve Wire Tool Functionality.
 2. Builderswork View Templates now include Mechanical Equipment tags as well as Generic Model Tags.
 3. Builderswork View Templates now have the View Range adjusted to -350mm below the associated level to allow for new insertion points for Builderswork Provisions and 2D symbols.

Tags & Annotations

- Standardised fonts to use Arial across all MagiCAD tags in the UK Localisation Pack.

Builderswork Schedule

- Added a filter to the Builderswork schedule so that only Builderswork Provisions are shown and not all Mechanical Equipment.

Dataset**UK-MCREV-2020_b_r2018.mrv****UK-MCREV-2020_b_r2019.mrv****UK-MCREV-2020_b_r2020.mrv****Duct, Pipe & Cable Route Series**

- Amended and updated DW144 duct fittings to address a bug with certain reducers causing erroneous error messages in the Sizing Calculation Report.
- Added examples of “N-Branch” (aka Multi-Port) fittings to PVC-U Drainage Pipework.

Electrical Systems

- Added example of new Connection Node components. (electrical connections for Mechanical Equipment)

MagiCAD 2020 Main Release (MR) for Revit

MagiCAD version 2020 (rev.a) MR

Updates incorporated within (rev.a) MagiCAD version 2020 MR.

Revit Template [UK-MCREV-2020_a_r2018.rte](#)
 [UK-MCREV-2020_a_r2019.rte](#)
 [UK-MCREV-2020_a_r2020.rte](#)

Settings

- Updated filters for Electrical systems to match CIBSE (SDE) system colours
- Updated Duct and Pipe Systems to match CIBSE (SDE) System names, colours and abbreviations
- Changed colours in Schematic View Templates to match CIBSE (SDE) system colours

Tags & Annotations

- Added Pipe Heating & Cooling Power (Cumulative Load) Tag into Annotations folder and Revit template
- Added Pipe Sprinkler Pressure Drop Tag into Annotations folder and Revit template

Builderswork

- Builderswork Provision families have changed from Generic Models to Mechanical Equipment, the following elements of this template have been updated to accommodate this change.
 1. View Templates updated
 2. New Filters created for visibility of Builderswork Provisions
 3. Existing Filters updated
 4. Redundant Families removed from Revit Template
 5. Tags for Builderswork updated in Annotations Folder and Revit Template
 6. Added new tag to show timestamp of Builderswork Provision to Annotations folder and Revit Template
 7. Added new tag to show height of circular provisions at the centre of the provision to the Annotations Folder and the Revit Template
 8. Builderswork Schedule updated

Dataset**UK-MCREV-2020_a_r2018.mrv****UK-MCREV-2020_a_r2019.mrv****UK-MCREV-2020_a_r2020.mrv****Duct, Pipe & Cable Route Series**

- Amended and updated DW144 duct fittings to latest components into dataset
- Amended and updated PVC plastic duct fittings to latest components into dataset
- Added example Mixing (Shunt) Units into dataset
- Added example Air Distribution Boxes into dataset

Electrical Systems

- Updated Circuit Numbering Rules to include Way Only (TP&N)
- Updated Electrical Power Circuit Types to include Current Protective Devices on all circuit types
- Updated Electrical and Communication & Data Systems naming and IFC colours to match CIBSE (SDE) Guidance

Symbols

- New Symbols for Builderswork Openings added into dataset

Builderswork

- Builderswork Provision families have changed from Generic Models to Mechanical Equipment, the following elements of this dataset have been updated to accommodate this change.
 1. Legend template for Builderswork Provisions
 2. Report Template for Bill of Materials
 3. Running Index updated

MagiCAD 2019 for Revit

MagiCAD version 2019 (rev.c) UR-2

Updates incorporated within (rev.c) MagiCAD version 2019 UR-2.

Revit Template [UK-MCREV-2019_c_r2017.rte](#)
 [UK-MCREV-2019_c_r2018.rte](#)
 [UK-MCREV-2019_c_r2019.rte](#)

Settings

- New noise calculation filter set to default as NR

Dataset [UK-MCREV-2019_c_r2017.mrv](#)
 [UK-MCREV-2019_c_r2018.mrv](#)
 [UK-MCREV-2019_c_r2019.mrv](#)

Settings

- Example offsets provided in the dataset for new product defined Builderswork opening / recess function for certain electrical, drainage and water services products

MagiCAD version 2019 (rev.b) UR-1

Updates incorporated within (rev.b) MagiCAD version 2019 UR-1.

Revit Template [UK-MCREV-2019_b_r2017.rte](#)
 [UK-MCREV-2019_b_r2018.rte](#)
 [UK-MCREV-2019_b_r2019.rte](#)

Tags & Annotations

- New Tags added for Diversified Ventilation Flow Rates
- Set BWO tags to support rectangular and circular automatic detection and selection
- Configured new line styles for improved Operating Area feature (MC Electrical Operation Area 1,2 & 3)

Views

- Added new BWO filter into Builderswork view templates to display openings more clearly
- Fixed broken filters for Electrical System colour overrides
- Minor changes to Electrical View Templates
- Modified Cable Packet tags to improve visibility
- Created new Electrical Distribution Strategy view
- Created new Electrical Distribution Strategy View Template
- Created Electrical Phase Areas Colour Fill Legend

Settings

- Modified Cable Packet tags to improve visibility
- Minor additions to Ground Conductor Ampacity tables in the Electrical Settings to allow new Cable Calculations to function properly

Dataset [UK-MCREV-2019_b_r2017.mrv](#)
 [UK-MCREV-2019_b_r2018.mrv](#)
 [UK-MCREV-2019_b_r2019.mrv](#)

Duct, Pipe & Cable Route Series

- Updated National Code to Uniclass 2015 for Drainage Pipe Series in Dataset
- Added standard conduit series to Dataset
- DW144 Flanged Ductwork Series updated within the dataset

Provision for Builderswork Openings

- Added example BWO Custom Size Range in Dataset to support new feature

Bill of Materials

- Set new sorting definitions in Bill of Materials templates

MagiCAD version 2019 (rev.a) MR

Updates incorporated within (rev.a) MagiCAD version 2019 MR.

Revit Template [UK-MCREV-2019_a_r2017.rte](#)
 [UK-MCREV-2019_a_r2018.rte](#)
 [UK-MCREV-2019_a_r2019.rte](#)

Families

- Uniclass 2015 system codes updated in line with update (February 2018 Ss-v1.9) the Uniclass codes will be automatically populated when bringing products in from the dataset.

Tags & Annotations

- A tag has been added for piping Loading Units for DWS and Discharge Units for Drainage
- A new tag has been added for Cable Packet for Overall Cable Width
- Cable Packet Size tag has been replaced with Cable Packet Weight tag

Configurations

- Updated Schematics Parameter Map .xml file with connection nodes example

Shared Parameters

- Added Running Index Parameter to commonly used Schematic Symbol types

Schemes

- Added Electrical Phase Areas Colour Fill Scheme for use with linking Spaces to Switchboards

Electrical Systems

- Added UK aligned Conduit Series to dataset

Dataset [UK-MCREV-2019_a_r2017.mrv](#)
 [UK-MCREV-2019_a_r2018.mrv](#)
 [UK-MCREV-2019_a_r2019.mrv](#)

Duct, Pipe & Cable Route Series

- Pipe thermal conductivity added to dataset

Electrical Systems

- Added UK aligned Conduit Series to Revit template

MagiCAD Templates

- Updated Bill of Materials templates to incorporate new features and refine existing features

MagiCAD 2018 for Revit

MagiCAD version 2018 (rev.d) UR-3

Updates incorporated within (rev.d) is made for MagiCAD version 2018 UR-3

Revit Template **UK-MCREV-2018_d_r2017.rte**
 UK-MCREV-2018_d_r2018.rte

- No updates

Dataset **UK-MCREV-2018_d_r2018.mrv**
 UK-MCREV-2018_d_r2018.mrv

Symbols

- Connection nodes schematic symbols

Parameters

- Parameters added to dataset for ventilation and piping

Electrical Systems

- Added electrical distribution systems typically used in the UK
- Added UK aligned voltage definitions

Product Content

- Added typical containment types to dataset

MC Running Index

- Added standard UK aligned circuit numbering systems to dataset

Insulation Series

- Pipe Insulation data updated and thermal conductivity added to dataset

MagiCAD version 2018 (rev.c) UR-2

Updates incorporated within (rev.c) is made for MagiCAD version 2018 UR-2

Revit Template [UK-MCREV-2018_c_r2017.rte](#)
 [UK-MCREV-2018_c_r2018.rte](#)

Cables

- 90°C Thermosetting BS7671 compliant cable types and wire sizes added to Electrical Settings.
- Renamed cable types to enable easier cable selection based on BS7671 cable descriptions rather than BS code numbers.
- Updated Electrical Installation codes which now include (HL) high level (LL) low level (CV) ceiling void.

Electrical Systems

- Added default IFC export colours for Electrical Systems.
- Updated default circuit ratings and symbols by circuit type

Views

- Revised default view templates to show linked elements in schematics and user review views

Tags & Annotations

- Duct and pipe data tags updated for improved display purposes

Schematics

- Added further schematic line types (as detail items) for duct, pipe, elec & comms
- Updated Switchboard Schematic template to suit new cable naming convention.
- Updated Switchboard Schematic symbols to suit new cable naming convention.

Dataset [UK-MCREV-2018_c_r2017.mrv](#)
 [UK-MCREV-2018_c_r2018.mrv](#)

Symbols

- 2D Symbols updated for Air Terminals within the dataset

Insulation Series

- Insulation series now has Uniclass 2015 codes in Dataset for ducts, pipes (water & drainage)

Duct, Pipe & Cable Route Series

- Flange types added to Dataset and added into duct series

Product Content

- Access panels added to Dataset

- Updated Standard Electrical and Data products in Dataset
- Updated default parameters for Electrical and Data products in Dataset

MagiCAD version 2018 (rev.b) UR-1

Updates incorporated within (rev.b) is made for MagiCAD version 2018 UR-1

Revit Template **UK-MCREV-2018_b_r2017.rte**
 UK-MCREV-2018_b_r2018.rte

Cables

- 90°C Thermosetting BS7671 compliant cable types and wire sizes added to Electrical Settings.
- Renamed cable types to enable easier cable selection based on BS7671 cable descriptions rather than BS code numbers.
- Updated Electrical Installation codes which now include (HL) high level (LL) low level (CV) ceiling void.

Dataset **UK-MCREV-2018_b_r2017.mrv**
 UK-MCREV-2018_b_r2018.mrv

Symbols

- 2D Symbols added for Air Terminals in dataset
- Schematic symbols added to dataset for ventilation, piping and electrical

Duct, Pipe & Cable Route Series

- Plastic duct and fittings added to dataset duct series

MagiCAD version 2018 (rev.a) MR

Updates incorporated within (rev.a) MagiCAD version 2018 MR

Revit Template [UK-MCREV-2018_a_r2017.rte](#)
 [UK-MCREV-2018_a_r2018.rte](#)

Tags & Annotations

- Added, amended and condensed MagiCAD Tags and added to the template

Duct, Pipe & Cable Route Series

- Rectangular and circular flex ducts added to dataset and loaded into Revit template

Product Content

- More Drainage Devices added with EN 12056 Discharge Units in dataset

Views

- Home Run arrows added to Wires in Lighting View templates
- Builderswork View Template added
- Combination Boxes filter added to Power & Data view template. Allows turning off/on of individual components within the combination box assembly

Shared Parameters

- Updated Ventilation Tags to include new MC Flow parameter for ducts

Dataset [UK-MCREV-2018_a_r2017.mrv](#)
 [UK-MCREV-2018_a_r2018.mrv](#)

Symbols

- Updated symbols for mechanical and electrical items in dataset

Product Content

- More DWS dummy outlets types defined with LUs in dataset
- Added example combination boxes / face plates to dataset

Duct, Pipe & Cable Route Series

- Updated pipe series for carbon steel for use with different size ranges and tee branches in dataset
- Updated Mapress pipe series in dataset with new fittings in dataset
- Domestic Water Roughness matches Hydronic Roughness for all pipe series in dataset

Design Data

- Added new balancing methods to dataset

MagiCAD 2016.11 for Revit

MagiCAD version 2016.11(rev.b) UR-1

Updates incorporated within (rev.b) MagiCAD version 2016.11 UR-1

Revit Template [UK-MCREV-2016_11b_r2015.rte](#)
 [UK-MCREV-2016_11b_r2016.rte](#)

Tags & Annotations

- Added, amended and condensed MagiCAD Tags and added to the template

Duct, Pipe & Cable Route Series

- Rectangular and circular flex ducts added to dataset and loaded into Revit template

Views

- Builderswork View added to Template
- Home Run arrows added to Wires in Lighting View templates

Dataset [UK-MCREV-2016_11b_r2015.mrv](#)
 [UK-MCREV-2016_11b_r2016.mrv](#)

Product Content

- Additional Drainage Devices added with EN 12056 Discharge Units into the dataset
- Additional DWS dummy outlets types defined with LUs in dataset

Duct, Pipe & Cable Route Series

- Rectangular and circular flex ducts added to dataset and loaded into Revit template
- Updated Mapress pipe series in dataset with new fittings in dataset
- Domestic Water Roughness matches Hydronic Roughness for all pipe series in dataset

Symbols

- Updated symbols for mechanical and electrical items in dataset
- Updated pipe series for carbon steel for use with different size ranges and tee branches in dataset

MagiCAD version 2016.11(rev.a)

Updates incorporated within (rev.a) MagiCAD version 2016.11

Revit Template **UK-MCREV-2016_11a_r2015.rte**
 UK-MCREV-2016_11a_r2016.rte

Shared Parameters

- All shared parameters now update with MC prefix loaded into template

Tags & Annotations

- New cable packet tags included for new wiring and cable packet circuit features:
MC_Cable_packet_CableIDs & MC_Cable_packet_CircuitIDs

Dataset **UK-MCREV-2016_11a_r2015.mrv**
 UK-MCREV-2016_11a_r2016.mrv

Symbols

- Water outlet symbols have been updated and added to the dataset

Duct, Pipe & Cable Route Series

- Mapress pipe series updated within dataset along with new fittings
- Amended pipe roughness in dataset for DWS systems in dataset

Product Content

- Added a selection of new electrical content in sockets, switches and data categories
- Added more DWS water outlet types in dataset
- Added example heating, cooling, DWS substations (Heat Exchangers) into dataset

Legend Templates

- Added No. of similar to Legend definitions in dataset. Added new elec example Legends definitions.
