MagiCAD for AutoCAD

Release notes for version 2021 UR-2.1

11/03/2021

MagiCAD

Content

1   Resolved issues

1.1   Ventilaion and Piping

Running index information added in previous versions of MagiCAD wasn't recognized in MagiCAD 2021 UR-2
Running index information added to the drawings, using previous versions of MagiCAD, in Ventilation & Piping wasn't recognized when opening the project with MagiCAD 2021 UR-2. Because of this you could neither see nor edit the Running indexes made with earlier versions of MagiCAD.
This has now been fixed and the running index information is available again.

The "Power" value was not shown in the dimension text for Zone valves
The "Power" value was not shown in the dimension text for Zone valves. This has now been fixed and the value is correctly updated to the valves and visible in the dimension texts:
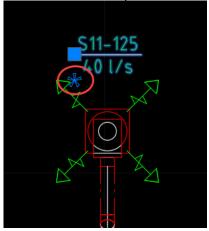

Previously:

Now:

"Create similar" wasn't available in dimension texts
The option to select a dimension text and utilize "Create similar" was not possible and this has now been fixed and the option is available in again in dimension texts:

1.2   Electrical

Running index information, added to provisions for buildersworks openings, in previous versions of MagiCAD wasn't recognized in MagiCAD 2021 UR-2

Running index information added to the drawings' provisions for buildersworks openings, using previous versions of MagiCAD Electrical, wasn't recognized when opening the project with MagiCAD 2021 UR-2. Because of this you could neither see nor edit the Running indexes made with earlier versions of MagiCAD.

This has now been fixed and the running index information is available again.
